Минздрава России

Dear Natalia,

Please accept our condolences on the loss of your husband and our great Professor Umberto Solimene. He was really worldwide person and highly appreciated in so many countries. Your husband always supported the National Medical Research Center for rehabilitation and balneology of Health Ministry of Russia. For our research team and department of international cooperation he was as a ray of sunshine and a landmark in the world of climatology and hydrotherapy. Just a few people in the world deal with this topic so we hope that we will continue this cooperation started by Professor Umberto Solimene.

Elena P. Ivanova, DMD, PhD  
The Head of International Cooperation Department
